How to Download the MT4/MT5 Video

Login

- 1. Find your MT4 Login details on the BDSwiss Dashboard when you log into your Trading account on the website
- 2. Open your MT4, fill in your MT4 account ID and select the Server of the desired account
- 3. The Password is the same used to register the Trading account

Login Issues

If you have issues logging into the MT4 desktop platform, after confirming that all login details are correct (Account ID + Server + same password used in BDSwiss account), and that you have downloaded the MT4 platform from our website, please follow the below instructions:

• 'File' > 'Open an Account'

Login Issues

- A pop up window will open where you need to click 'Scan'
- Once the green bar is full, you need to select the correct Server address and click 'Next'

CySEC:

Login Issues

• Once the correct server has been selected, choose login into an 'Existing trade account', fill in the details and click Finish

0.95075		
 Open an Account ?	×	
Select account type To start working an account is required:		
To start working, you need a valid trade account. If you don't have it, you can create a demo or real account by selecting the corresponding option below and pressing 'Next'.		
 Existing trade account		
 Login:		
Password: Save password		
 Server: BDSwiss-Demo01		
New demo account		
O New real account		
	_	
 < Back Finish Cancel		

Note: Password reset only needs to be done if you are still unable to login after these steps

Market Watch

The top left window is called the Market Watch, where you'll find a list of assets available to trade on the MT4 platform and the **Bid** and **Ask** prices.

You can open or close it by pressing the hotkeys 'Ctrl + M' or from the menu click 'View' > 'Market Watch' or by clicking the button on the standard toolbar.

- You can choose from *Forex*, *Commodities*, *Indices*, *Equities* and *Cryptocurrencies* and you can search through the symbols by the first letter with the keyboard.
- The *Market Watch* gives you the ability to observe price changes on instruments in real-time.
- Right-click on the Symbol > 'Chart window' or drag the Symbol with the mouse to the chart window to see the graphical representation of the price movement.

Specifications

In the MT4 platform, open the Market Watch window, right-click on the asset you want to check the details

of and select 'Specification'.

This pop-up window allows to view the contract specifications. The main parameters are the following:

Spread – difference between Bid and Ask prices;

Digits – the amount of digits after decimal point in the price representation;

Stops level – minimum distance to the current price in points at which Stop Loss and Take Profit orders can be placed;

Contract size – one-lot price in deposit currency;

Minimal/Maximal volume - lowest and highest lot allowed per trade;

Swap type – rollover calculation type (in points or in percentage);

Swap long/short – rollover size for a long/short position;

3-days swap - information about the day of the triple rollover fees;

Sessions - trading schedule.

Candlesticks Explained

There are three specific points that create a Candlestick: the Open, the Close, and the Wicks.

Candlesticks are comprised of a body which represents the difference between the Open and Close prices.

- Up candlesticks (Bullish) occur when the close price is higher than the open
- Down candlesticks (Bearish) occur when the close price is lower than the open
- If the open price is equal to the close price there will not be a body, just a line this type of candle is referred to as a 'Doji':

The thinner lines extending beyond the body are called 'Wicks' – above the body is the high and below the body is the low for the selected time period.

Candlesticks Explained

Open price - The open price depicts the first traded price during the formation of a new candle.

High price - The top of the upper wick. If there is no upper wick, then the high price is the open price of a bearish candle or the closing price of a bullish candle.

Low price - The bottom of the lower wick. If there is no lower wick, then the low price is the open price of a bullish candle or the closing price of a bearish candle.

Close price - The close price is the last price traded during the formation of the candle.

If you have the chart on a daily setting each candle represents one day, with the open price being the first price traded for the day and the close price being the last price traded for the day.

Customize Colors

You are able to fully customize charts to your preferences by pressing F8 or rightclicking on the chart window > 'Properties' > 'Colors'

Ask Line

The MT4 chart shows the BID (sell) line by default. The ASK price line is not visible on the Chart.

 To add the ASK line you need to press F8 or right-click on the chart window on the MT4 > 'Properties' > 'Common' > 'Show Ask line' > OK

Chart autoscroll Scale fix One to One Scale fix 0.88440 Fixed maximum	Show OHLC Show Ask line Show period separators Show grid Show volumes
---	---

Navigator

In the Navigator window you will be able to see, in tree from, the list of open Accounts (and be able to switch between them), Indicators, EAs and Scripts.

 You can open or close it by pressing the hotkeys 'Ctrl + N' or from the menu click 'View' > 'Navigator' or by clicking the button is on the standard toolbar.

Terminal

The Terminal is where you manage and monitor your trading, open trades and pending orders, and check details such as your trading Account History, overall Balance and Equity, and Margin.

 You can open or close it by pressing the hotkeys 'Ctrl + T' or from the menu click 'View' > 'Terminal' or by clicking the button in on the standard toolbar.

How To Place a Trade on the MT4

21

New Order

To open a position, at the current market price - Market Execution, click 'New order' on the desired asset or press the F9 hotkey on the chart window and a new pop-up window will open. Here you can set the volume of the trade in lots, the Stop Loss and Take Profit, and then click on the Sell or Buy button (1.)

You can also enable the One Click trading on the chart by clicking 'Alt + T' where you simply select the volume of the trade and click on the SELL or BUY Button on the top left corner of the chart (2.)

2

Pending Order

If you want to place an order, not for immediate execution, but for when a certain price point has been hit - Pending Order.

You will have 4 options:

- Buy Limit If you plan on going long at a level lower than the market price
- Sell Limit If you plan on going short at a level higher than the market price
- Buy Stop If you plan on going long at a level higher than the market price
- Sell Stop If you plan on going short at a level lower than the market price

	0.86149					
	0.86147					

Modify Order

- Right-click on the desired order and then click 'Modify or Delete Order' (1.) a pop-up window will open to allow the trade to be modified
- Or, double-click on the desired order and a the pop-up window will appear where you can Modify Order on the Type drop down list (2.)
- Click on the Blue Modify button to save the changes

Invalid S/L or T/P

If you are unable to open a trade and you receive the error message Invalid S/L or T/P.

 Right-click on the asset on the Market Watch window > 'Specifications' > 'Stops level' and check the distance, from the actual price, that the S/L and T/P needs to be placed

S/L and T/P Lines

If you place a trade with S/L and T/P and you cannot see the selected levels line on the MT4:

1. Make sure that you have this option enabled by pressing 'Ctrl + O' or going to 'Tools' > 'Options' > 'Charts' > click 'Show Trade Levels' > OK

* If selected, you will be able to change the S/L and T/P levels on the chart window by pressing 'Alt' and dragging the lines

S/L and T/P Lines

You can also select the open trade on the 'Trade' tab on the 'Terminal' window > drag and drop the open trade on the chart

Trailing Stop

- Right-click on the desired order on the 'Terminal' > 'Trade' window and then click on the 'Trailing Stop' option
- A list of options will open, where you can select your desired distance between the TP level and the current price or customize it.
- The Trailing Stop works in the terminal, not in the server (like SL or TP) It will not work if the terminal is off. In this case, only the Stop Loss level that has been set by the Trailing Stop will be triggered.
- Trailing Stop is processed once per tick. If multiple orders with Trailing Stop are open for one symbol, only the trailing stop of the latest open order is processed.

Partial Close

To Partially Close an Order, double-click on the order and a new pop-up window will appear where you can select the Volume you wish to close and then click on the yellow Close button.

🛧 EUR(GBP.			0.861	11	0.	86127	

• Right-click on the chart window to open the Objects List window or press 'Ctrl + B' and manage your chart objects (edit line thickness, delete etc.)

Technical Indicators

To Add Technical Indicators on a chart:

3. You can also drag and drop Indicators from the Navigator window

- Click on the 'Indicators' button for on the toolbar and select the desired Indicator (1.)
- **Or**, right click on the Chart window and a new pop-up window will open, then select Indicator List and add the desired Indicator (2.)

Note: Once you click on the desired Indicator a new pop-up window will open where you can change the parameters to your preferred ones

Technical Indicators

You can **Download** Technical Indicators that are not available by default on the MT4.

- You can download them directly on the MT4 platform on the 'Market' section on the Terminal window and then you will see them on the Navigator window under the 'Indicators' > 'Market'
- Or, you can download the Indicators from other sources:
 - 1. Download the files (.ex4 and .mq4 formats)
 - 2. Add them on the MT4 by going to 'File' > 'Open Data Folder' > 'MQL4' > paste or drag the Indicator to the 'Indicators' Folder
 - 3. Close and restart the MT4
 - 4. You will then be able to see the new Indicators on the Navigator window under the 'Indicators' directory and on the 'Indicators List' > 'Custom'

To **Delete** Technical Indicators:

- Right-click on the desired Indicator on the Chart window and a pop-up window will open, and then select Delete Indicator (1.)
- •
- Right-click on the Indicator window (technical indicators like Oscillators for e.g. are opened in a separate window) and a new pop-up window will open, then select Delete Indicator Window (2.)

Profiles

 You can create Profiles of assets you would like to trade by setting up a group of charts of your preferred assets (with different timeframes, indicators, etc.) and then click on 'File' > 'Profiles' > 'Save as' > 'Enter new profile name' > OK or by clicking the buttor on the standard toolbar.

- To Load the new profile, you can go back to 'File' > 'Profiles' or click on the 'Profiles' button and then click on the name of the desired profile
- To Delete a profile you need to go to 'File' > 'Profiles' > 'Remove' or click on the 'Profiles' button -> 'Remove' and then click on the profile you want to delete

Templates

You can create **Templates** that allow you to overlay predefined indicators and other adjustments (ask line, different candle colors, etc.), to a chart. Creating a template allows you to load these predefined settings instead of having to set it up again each time you open a new chart.

- 1. Open a new chart > Apply all the indicators and settings you wish to use on that chart
- 2. Right-click on the chart window or click on the 'Templates' button root on the chart toolbar

- A drop down menu will appear, click on 'Template' > 'Save Template' > 'Name the Template' > Save
- If you want the template to be the default one for every new chart you will need to name the template as Default

*

- To Load a template you need to right-click on the chart window or click on the 'Templates' button rollick on the chart toolbar and click on the name of the desired template on the list or click on 'Load Template' to choose from the templates folder
- To Delete a template you need to right-click on the chart window or click on the 'Templates' button on the chart toolbar > 'Remove'

Expert Advisor

Expert Advisors (EAs) are programs that you install onto the MT4 that will automatically follow instructions once a certain criterion has been met, so basically they are used for automated trading.

To add an EA, you need to:

- Add it on the MT4 by going to 'File' > 'Open Data Folder' > 'MQL4' > paste or drag the EA to the 'Experts' Folder
- 2. Restart the MT4 and you will be able to see it on the Navigator under 'Expert Advisors'

To enable an EA, you need to:

- 1. Go to 'Tools' on the menu > 'Options' or press 'Ctrl + O' > 'Expert Advisors' > 'Allow Automated Trading'
- 2. Enable Auto Trading on the standard toolbar.

Expert Advisor

- 3. You will then be able to drag and drop the EA to the chart and manage the EA from the Navigator window > 'Expert Advisors'.
- 4. Confirm all the EA settings and then, once it's enabled, you will be able to check it on the 'Experts' tab on the Terminal window

You can also check the EA Properties by pressing F7 or right-clicking on the chart window > 'Expert Advisors', where you can also remove it:

Note: You will also be able be able to check if the EA is enabled or not by the symbol on the right-top corner of the chart window

Strategy Tester

The Strategy Tester allows you to test and optimize Indicators and Expert Advisors before using them.

- To enable the Strategy Tester click on the button and toolbar or press 'Ctrl + R'
- Or, on the chart window with the EA, right-click > 'Expert Advisors' > 'Strategy Tester' or press F6

The Tester window will open below the Terminal window:

Note: On the Tester window you can select EA or Indicators
